

FBI-SOS for the month of February Lake Stevens Middle School

During the month of February, the sixth grade students who were enrolled in the Technology course participated in the FBI-SOS (Safe Online Surfing) program. The students completed several tasks such as a pre-test, post-test and a scavenger hunt. These students achieved the highest scores on the post-test for the month of February and were honored with an award from the FBI on March 19th.

The FBI-SOS program focuses on Internet safety and presenting students with the knowledge of identifying and properly reporting dangers they face when using email, chat rooms, and surfing on the Internet. Students have learned how to be equipped to handle dangers and protect themselves from online predators. As an extension from this program, the students have created informational flyers to be posted in the hallways of LSMS to educate other students about online safety. We are also encouraging students to share their knowledge with their parents and friends. Our main goal is for all students to be safe and educated.
